Career Profile

Recent Computer Science Engineering graduate looking for start of career in AI, autonomous systems, or other interesting software development. 10+ years of overall programming experience starting at age 12 developing iOS apps. Strong foundation in data structures, algorithms, and full-stack development. Proficient in Java, Python, JavaScript, SQL, and C-family languages among others. Built and deployed applications in web, mobile, AI, and cybersecurity. Adept at version control (Git), debugging, and collaborating in Agile environments. Experience working with AI Agent Development including Cursor, Claude, GitHub Co-Pilot, Zapier, and OpenAI along with other LLMs.

Technical Skills

Languages: Java, Python, JavaScript, C++, C#, C, Rust, SQL, Bash, Assembly, Visual Basic

Frameworks/Tools: React, Unity, Unreal Engine, REST, Git, Sourcetree, JetBrains IDEs, Azure, Visual Studio, Cursor, Claude, OpenAI, Replit, Zapier.

Databases: SQL Server, SSMS

Other technologies: Linux, Google Colab, GitHub, TestFlight, Linear, SharePoint, Photoshop

Education

B.S. in Computer Science from Baylor University— May 2025

Relevant Coursework: Data Structures, Algorithms, Systems Programming, Cybersecurity, AI, Database Design, Operating Systems, Digital Logic Design, Data Science and LLMs

Certificate in AI Agents and Agentic AI with Python & Generative AI from Vanderbilt

Certificate in AI Agents and Agentic AI Architecture in Python from Vanderbilt

Experience

- NurseLoop (software start-up) – Remote

Software Engineer — August 2025-Current (*contract work for software start up*)

- Provided quality assurance and feedback after continuous testing of the builds of their product, improving overall UI experience and preventing 25+ bugs before demoing their builds.
- Integrated Zapier into the team's project flow in Linear to organize the team's tasks and built visualizations from tables to gantt charts, providing a clearer and more organized structure for the team members and improving the team's overall quality of work.

- FreightPOP – Lake Forest, CA

Software Engineer Intern — Summer 2024

- Developed and maintained backend systems using C# in a team-based Agile environment
- Resolved 20+ software bugs, enhancing security and user experience
- Implemented SQL injection prevention and data masking, improving application security by 30%
- Reduced UI errors by 40% through improved error handling logic

- Reaction Audio Visual – Rancho Santa Margarita, CA

IT & Software Engineering Intern — Summers 2021–2023

- Utilized Zapier platform to create AI agents and integrate several software products including HubSpot
- Imaged and custom deployed 100+ Macs, PCs, and iPads across multiple environments
- Automated updates and portal modifications with custom scripts, reducing manual workload by 25%
- Managed company SharePoint and Teams infrastructure to streamline internal communications
